Toxicology 135 (1999) 127–128

TOXICOLOGY

Contents of volume 135

Articles

Ochratoxin A-binding proteins in rat organs and plasma and in different cell lines of the kidney
G. Schwerdt, R. Freudinger, S. Silbernagl, M. Gekle (Germany) 1–10
Covalent binding of OTA to horseraddish peroxidase allows tracing of the mycotoxin

Anthraquinone-induced cell injury: acute toxicity of carminomycin, epirubicin, idarubicin and mitoxantrone in isolated cardiomyocytes
B.S. Andersson, S. Eksborg, R.F. Vidal, M. Sundberg, M. Carlberg (Sweden) 11–20
Cytotoxicity seems to be related to the lipophilicity of the anthraquinones

Changes in hepatic nitrogen metabolism in isolated perfused liver during the development of thioacetamide-induced cirrhosis in rats
S. Masumi, M. Moriyama, Y. Kannan, M. Ohta, O. Koshitani, O. Sawamoto, T. Sugano (Japan) 21–31
Developing cirrhosis of the liver diminishes capacity for urea production

In vitro inhibition of liver monooxygenases by β-ionone, 1,8-cineole, (−)-menthol and terpineol
A.C.A.X. De-Oliveira, A.A. Fidalgo-Neto, F.J.R. Paumgartten (Brazil) 33–41
A detailed kinetic analysis

Investigation of some immunological functions in a group of asphalt workers exposed to polycyclic aromatic hydrocarbons
A. Karakaya, B. Yücesoy, A. Turhan, O. Erdem, S. Burgaz, A.E. Karakaya (Turkey) 43–47
CD4$^+$T cells, monocytes and serum IgC levels were found higher in workers exposed to PAH compared to controls

In vitro exposure effects of cyclosporin A and bis(tri-*n*-butyltin)oxide on lymphocyte proliferation, cytokine (receptor) mRNA expression, and cell surface marker expression in rat thymocytes and splenocytes
R.J. Vandebriel, S.W. Spiekstra, B.N. Hudspith, C. Meredith, H. Van Loveren (The Netherlands, UK) . . . 49–66
The antiproliferative effects of TBTO are suggested to be more important than on apoptosis

Effects of sublethal radiation on bone marrow cells: induction of apoptosis and inhibition of antibody formation
Exposure of mice to 2.0 Gy gamma rays induced decreased antiTNP antibody formation and depletion of B cells
S.N. Goud (USA) 69–76

Lead intoxication: antioxidant defenses and oxidative damage in rat brain
Glutathione reductase and peroxidase levels were increased and ubiquinol 10 was lower in the brains of lead treated animals
V.N. Adonaylo, P.I. Oteiza (Argentina) 77–85

Effect of inhalation exposure to 2-bromopropane on the nervous system in rats
Long-term exposure to 1000 ppm produces peripheral neuropathy
X. Yu, G. Ichihara, J. Kitoh, Z. Xie, E. Shibata, M. Kamijima, N. Asaeda, N. Hisanaga, Y. Takeuchi (Japan) 87–93

Differential toxicities of TCDD in vivo among normal, c-src knockout, geldanamycin- and quercetin-treated mice
Toxic endpoints of TCDD's action not expressed in c-src deficient mice are defined
D.Y. Dunlap, M.J. Moreno-Aliaga, Z. Wu, F. Matsumura (USA) 95–107

The nitric oxide-producing activities of *Scutellaria baicalensis*
NO production by *Scutellaria baicalensis* is the result of increased TNF-alpha secretion
H.-M. Kim, E.-J. Moon, E. Li, K.-M. Kim, S.-Y. Nam, C.-K. Chung (South Korea, China) 109–115

Announcement 117–118
